ONE WAY TRAFFIC CONTROL SYSTEM FOR 900 BLOCK OF CRUCE STREET

At the regularly scheduled meeting on Tuesday, July 22, 2014, the Norman City Council approved the implementation of a one way traffic control system for the 900 block of Cruce Street. This roadway is located on the north side of McKinley Elementary School, between Flood Avenue and Pickard Avenue. The change in traffic flow is one of the elements of a larger plan to improve traffic circulation around the school. This plan, which was developed in collaboration with the school's Campus Safety Committee, Norman Police Department, and the City Public Works Department, will re-orient student pick up and drop off traffic away from Flood Avenue to Cruce Street and a new driveway along the west side of the school property, immediately east and parallel to Pickard Avenue. This change will be enforced between 7 a.m. and 4 p.m. weekdays. During the week of August 18, 2014, Traffic Control Division personnel will install the necessary signs to implement this one way system.

Questions regarding the project should be directed to the City Transportation Engineer, Angelo Lombardo, at (405) 366-5327 or Angelo.Lombardo@NormanOK.gov.
